SUMMARY

- Frontend Technologies: Proficient in HTML5, CSS3, and JavaScript ES6+ for building structured, responsive, and interactive user interfaces.
- CSS Frameworks: Experienced in using Bootstrap for rapid UI development and Sass (SCSS) for writing modular, maintainable stylesheets.
- JavaScript Libraries: Familiar with jQuery for DOM manipulation, event handling, and AJAX requests.
- Responsive Design: Strong understanding of cross-browser compatibility and mobile-first responsive design principles.
- Version Control: Basic knowledge of Git for code versioning and collaborative development.
- Design to Code Conversion: Able to convert PSD/Figma designs into fully functional, pixel-perfect static websites.

EDUCATION

2021 - Pursuing
AKTU

B.Tech. (CSE)

SKILLS

- HTML5
- CSS3
- JavaScript
- jQuery
- Bootstrap
- SASS
- PSD to HTML5

PROJECTS

Admin Dashboard

Tech Stack: HTML5, CSS3 and JavaScript.
Description: A responsive admin dashboard interface featuring analytics widgets, navigation sidebar, cards, tables, and charts. Designed to mimic a real-world admin panel for business or SaaS applications. Highlights proficiency in UI/UX layout structuring, and dashboard theming. Ideal for demonstrating understanding of modern dashboard architecture.

GitHub Identity Card

Tech Stack: HTML5, CSS3, JavaScript (GitHub API)
Description: A dynamic web app that fetches and displays GitHub user data using GitHub's public API. Demonstrates practical usage of API integration and asynchronous JavaScript.
🔗 Live Demo | 📁 Source Code

Product Listing Website

Tech Stack: HTML5, CSS3, JavaScript (FakeStoreAPI)
Description: An interactive product catalog using FakeStoreAPI to fetch and display products dynamically. Built to practice working with APIs, JSON data, and DOM manipulation.
🔗 Live Demo | 📁 Source Code

Deliver – Service Based Company Website

Tech Stack: HTML5, CSS3, SASS and JavaScript
Description: A clean and structured multi-page business website built with Sass for efficient, modular styling. Includes service listings, testimonials, and a responsive layout to enhance user experience.
🔗 Live Demo | 📁 Source Code

Trendy

Tech Stack: HTML5, CSS3 and Bootstrap
Description: A stylish and mobile-responsive fashion landing page built using Bootstrap framework. Showcases effective use of prebuilt components, utility classes, and responsive grids.
🔗 Live Demo | 📁 Source Code

Dream Dine – Restaurant Website

Tech Stack: HTML5, CSS3, JavaScript and jQuery
Description: Designed and developed a full-fledged restaurant website from a PSD file. Includes menu sections, image galleries, and responsive layout techniques to ensure seamless performance across devices.
🔗 Live Demo | 📁 Source Code

Coffee Time

Tech Stack: HTML5, CSS3, JavaScript and jQuery
Description: A responsive and animated cafe website created from a PSD design. Features smooth transitions, interactive sections, and a modern layout, demonstrating strong skills in design conversion and DOM manipulation.
🔗 Live Demo | 📁 Source Code
